

Journal Citation Reports

Introduction

Journal Citation Reports (EJCR) aim to review, evaluate and rank accredited journals. The quantitative method is based on the authors' use of journals and, more importantly, journals' use of other journal articles. This website is available in Persian, Arabic, and English at <https://jcr.isc.gov.ir/>.

Homepage

As below, the main page of the website welcomes you. There are language options as “FA”, “AR” and “EN” on the top right side of the page. The list may be refined by JCR year to generate a range of year-specific citation data. The table illustrates the journal titles, JCR year, impact factor, immediacy index, total cites, article number, and journal collections.

Row	Title	Year	Impact Factor	Immediacy Index	Total Cites	Articles
1	3: the southeast asian journal of english language studies	2017	0.425	0.253	111	55
2	abant izet baysal university graduate school of social sciences journal of social sciences	2017	N/A	N/A	1	0
3	abant izet baysal university journal of faculty of education	2017	N/A	N/A	23	29
4	abstract and applied analysis	2017	0.053	0.029	310	17
5	academia-revista latinoamericana de administracion	2017	0.061	0.029	7	34
6	academic psychiatry	2017	N/A	N/A	0	0
7	aca central science	2017	N/A	N/A	0	0
8	aca macro letters	2017	N/A	N/A	0	0
9	aca sensors	2017	N/A	N/A	0	0
10	acta adriatica	2017	0.109	0.029	8	34

Figure 1. JCR Homepage

Table Fields

1. Row: it indicates the No. of each data row.
2. Title: when a journal title is clicked, the user is guided to the list of journal data in Farsi.
3. Citation year: this is the JCR year in which a journal report is prepared. When the main page is open, the latest JCR year is shown by default. Solar Hijri is for Farsi language and Gregorian year for Arabic and English languages.

4. **Impact Factor:** journal impact factor is computed via the following formula. A two-year period is considered to calculate the impact factor. Each journal IF is accessible by clicking on the journal icon to show IF calculation in detail (see Fig. 2).

$$\frac{\text{Cites in the JCR year to articles published in two preceding years}}{\text{Number of articles published in two preceding years}}$$

Figure 2. Impact Factor Calculation

5. **Immediacy Index:** II is calculated for each journal per citation year. II is a link in this table to click and see the related details (see Fig. 3).

$$\frac{\text{Cites in the JCR year to articles published in JCR year}}{\text{Number of articles published in JCR year}}$$

Figure 3. Immediacy Index Calculation

6. **Cumulative Citation:** it is the sum of all citations in the year of interest.

7. **Articles:** all articles in the year of interest.

8. **Journal Collection:** ISC-covered journals are assigned to three collections based on scientific rigor and quality.

- **Core Journals:** ISC Core Collection is a repository of the journals with the highest caliber in various disciplines and subject areas. The journals undergo rigorous content analysis by a panel of experts in the relevant disciplines based on a set of stringent criteria to assure the high quality of the scientific content. Novelty of research topics,

applicability of research findings in the field, readability and academic quality, sound methodology, clear and systematic presentation of the findings, logical discussion, sound reasoning and deductions are some of the metrics considered while evaluating the titles for coverage in the core collection. The journals covered in the core collection undergo periodic annual evaluation, and once they fail to meet the inclusion criteria, they are relegated to either the ISC waiting list or ISC Primary journal list depending on the degree of backslide.

- **Waiting-List Journals:** ISC Waiting List hosts a pool of indexed journals with promising quality and scientific content. The pool is derived from ISC Primary Journal List following evaluation based on a set of fine-tuned, moderately demanding benchmarks. Upon fulfilling the evaluation criteria, journals will land in the Waiting List for a rather short period, no longer than a year, until they are considered for coverage in the Core Collection. Journals that fall short of the waiting list standards will be demoted to the ISC Primary Journal List. International focus, publisher credibility, academic standing of editorial board, publication history, use of advanced journal submission systems, self-citation rate, and quartile ranks are the major criteria against which the titles are examined for coverage in ISC Waiting List.
- **Primary Journal List:** ISC Primary Journal List is a list of journals covered in all databases of ISC. The journals are divided into four categories according to their languages: Farsi (Fa), English (En), Arabic (Ar) and French (Fr). Once candidate journals request indexing in ISC databases, they are examined based on a set of rudimentary structural metrics. Accordingly, they will be indexed in ISC Primary Journal List once they meet the inclusion criteria. Besides, the journals undergo periodic evaluation for likely promotion to the ISC Waiting List or, if fail to meet the indexing metrics, they are excluded from all databases. The basic metrics used to evaluate journals for coverage in ISC Primary Journal List include academic credibility, publisher's reputation, geographical diversity of authors, geographical diversity of the editorial board, citation and bibliography specifications, regular publication, adherence to journal policy and scope, peer-review process, editorial board citation score, and online access to journal content.

9. Details: this icon provides further information on each journal. Clicking on this icon gives all details of a journal (see Fig. 4 as an example).

3: the southeast asian journal of english language studies

Journal Status Cited Journals Citing Journals Cited Half Life Citing Half Life Journal Information

Fig. 4: Details Page

This section provides the following specifications:

- **Journal Status:** this part gives an overview of the journal quality in the past years. Journal Status demonstrates Citation Year, Journal Quality in comparison with other related journals, Self-Citation Percent, Impact Factor, Macro-level Subject Category, Average IF in Macro-level Subject Category, Mid-level Subject Category, and Average IF in Mid-level Subject Category.
- **Quality:** as shown in the table below, journals are assigned to different quartiles based on their impact.

Quartile	symbol	Description
Q1		Q1 at Mid-level
Q2		Q2 at Mid-level
Q3		Q3 at Mid-level
Q4		Q4 at Mid-level
No Quality		Journals with IF=0.00

N/A		<p>Incomplete journal archives in ISC databases or a publication history gap for JCR year</p>
-----	--	---

- **Impact Factor Trend Line:** this diagram illustrates journal impact factor by year.
- **Quartile and Impact Factor in the Field by Year:** this diagram shows journal impact factor and quartiles in different subject categories by year. Each quartile is shown in a different color, and impact factor subject by year is displayed when moving the mouse pointer over the diagram boxes. The journals are assigned to a three-level subject categorization scheme for JCR 2017 illustrated on the Y-axis of the diagram.

Figure 5. Journal Status

- **Cited Journals:** As shown in Fig. 6, all journals cited by a given journal are listed along with the No. of citations in each year. One can see all cited journals of a given journal in a graph by clicking on the green icon as in Fig. 7.

Fig. 8. Cited half life

Fig. 9: Cited Half Life Calculation Method

Citing Half Life: like cited half-life, a ten-year period is taken to calculate citing half-life. Clicking on the red icon provides the calculation method.

Journal Information: this section provides identification information including journal title; (E)ISSN; Macro-, Mid-, and Micro-level subject category; country; publisher; address; website; and email.

Sorting: you can sort all data in the table by clicking all field titles; they include quality, title, impact factor, immediacy index, cumulative citation and No. of citations in either ascending or descending orders. By default, all data are sorted in ascending order.

Table Properties: as in Fig. 10, there are starting point and endpoint indices, total No. of records, and pagination at the bottom of the table to move through the pages.

The screenshot shows the English Journal Citation Reports (EJCR) search interface. At the top, there are navigation links: Main Page, Completed Journals, Excluded Journals from ISC, Help, Contact Us, and Islamic World Science Citation Center (ISC) Website. The interface includes search filters for Title or ISSN, Macro Level Subject, Publisher, Country, Language, Mid Level Subject, Micro Level Subject, and Year. A search button and a download button are also present.

Advanced Search (Introducing Filters)

As shown in Fig. 11, the blue icon does the search in different fields. Searchable fields include journal title, ISSN, country, macro-level subject, mid-level and micro-level subjects, publisher, and year. You may enter the search terms into the fields and click “Search” to produce the desired list. The fields of country, publisher, and subject categories open as drop-down menus allowing for multiple item search (e.g. selecting a few macro-level subject categories together). Moreover, a few fields may be searched simultaneously (e.g. searching in the macro-, mid-, and micro-level subjects plus publisher at the same time). It should be noted, though, that lower-level subject field menus are reassorted based on the search queries at higher-level subject categories. For example, when Medicine or Basic Sciences is selected as the macro-level subject, the list of available mid-level subjects to search in is refined accordingly. However, when no macro-level subject is selected, the list of mid-level subjects remains exhaustive and unrefined. In multiple selections, you may click the cross mark (×) next to an item to remove it from the list. Besides, clicking the cross mark (×) at the rightmost end of each field will delete all selected items. The field of “Country” includes three groupings including OIC, D-8, and Middle East, each populated with a list of countries in the respective group. The field of “Year” may be filtered for different intervals.

Completed Journals

This is a list of journals with completed archives in ISC databases. Impact factor is not reported for a journal unless it has full archives of the JCR year plus two preceding years. For instance, full archives of the 2015, 2016, and 2017 issues are necessary to include a journal in JCR 2017. To see a journal's archives, please visit <https://ecc.isc.gov.ir>.
